General Comment

A few points that I would like you to address:

- Contraception is part preventive care for women, and access to wide-ranging contraceptive care is in the best interest of women's health, children, and our communities.
- Please support cost-sharing for preventive care services like contraception.
- I will not accept anymore unnecessary and unreasonable delays in access to contraceptive care as preventative health services.
- We need your help to ensure access to family planning services in the dawn of health care reform for women, families and communities.
